

For Agricultural Spraying Drones

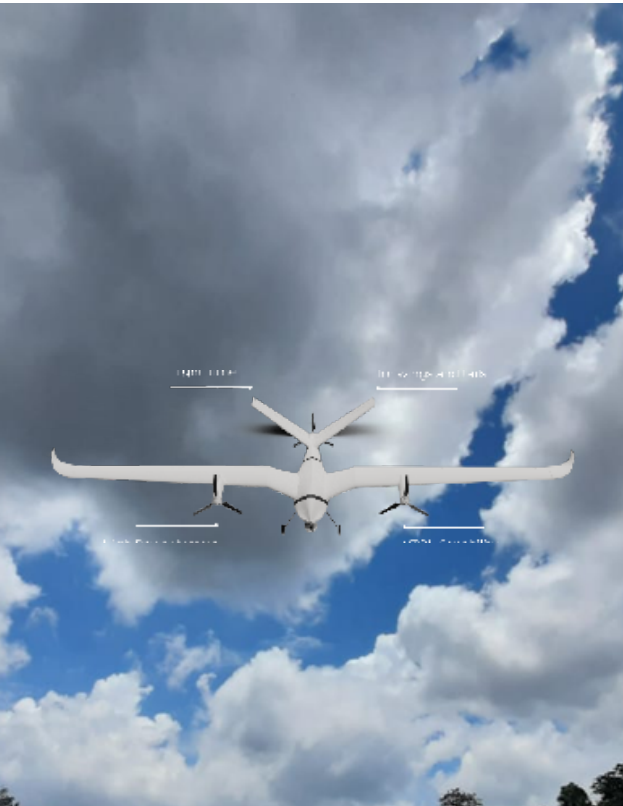

Spray longer by using mPower's high endurance lithium-ion batteries for any model of 10L, 12L and 16L drones. Offers 21min of flight time on a single charge for prices affordable than LiPo equivalents.

Magnipower Technology LLP

Welcome to our world of high-quality lithium-ion drone batteries! Our commitment to excellence is backed by a range of premium lithium-ion cells that help us manufacture top-of-the-line drone batteries. Our batteries cater to a wide range of drones such as Agricultural Spraying Drones, Survey Drones, Surveillance Drones, and Delivery Drones.

- Upto 40% smaller in size
- Upto 16% lighter in weight
- BIS certified
- Upto 1.5x better performance
- Trusted by 35+ drone OEMs
- Ship out within 48hrs
- Customisable to OEM specifications
- Best Customer Support
- Recycling of used drone batteries

For Delivery Drones

Our drone batteries are used by OEMs to successfully deliver up to 50 kgs during trials in Ladakh-Leh region at 18,000' MSL and temperature of - 60 °C. Our innovative thermal management solution for batteries include both heating strips and resin-based enclosures.

For Surveillance and Survey Drones

mPower Batteries powering VTOLs and Multicopters

We work with several OEMs on surveillance VTOLs meeting the fit, form and function of drones. Using premium quality cells manufactured in a world-class infrastructure we offer the best lithium-ion batteries in the world.
